Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This Office action is responsive to the Amendment filed on December 23, 2003 as well as the election filed on March 11, 2004.

Claim Objections

2. The previous objection to claim 11 is withdrawn due to the amendment filed on December 23, 2003. Claim 23 has been withdrawn from consideration.

Claim Rejections - 35 USC § 112

3. With regard to the previous rejections of claims 1-15 under 35 U.S.C. 112, second paragraph, these are withdrawn due to the amendment filed on December 23, 2003. Claims 16-27 have been withdrawn from consideration.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2186

5. Claims 1-15 and 28-38 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Akaogi et al., U.S. 6,240,040.

Akaogi et al. teach the claimed use of a non-volatile synchronous Flash memory system (200) with arrays of memory cells arranged in a plurality of addressable banks (e.g., four banks -- 202, 204, 206, 208), each of which may be coupled onto one with an associated output buffer (note column 7, lines 59 et seq. and column 9, lines 8-19) to store data from the corresponding addressable bank, wherein data may be read out of the buffer simultaneously with data being read into one of the Flash memory banks. Note column 9, lines 44 et seq. wherein when "any of the other banks can be accessed for a read operation" would include reading from one of the output buffers of column 7 simultaneously with writing into a Flash memory bank.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-15 and 28-38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of copending Application No. 09/628,184. Although the conflicting claims are not identical, they are not patentably distinct from each other because every feature of the claims of the present invention which was either explicitly taught or would have been obvious in view of limitations of claims 1-23 of the copending application. The only difference between the present claims and the claims of the '184 application is that the present claims utilize a read buffer (output buffer) for the Flash banks. Both sets of claims recite simultaneously reading and writing to flash memory banks, however the present claims include the obvious and well known use of a read buffer during such operation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Peikari whose telephone number is (703) 305-3824. The examiner is generally available between 8:00 am and 9:30 pm, EST, Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Kim, can be reached at (703) 305-3821.
